CONTROL SOLUTIONS PTY LTD

# Capability Statement

# Company Overview

---

Established in 2018, BayCoast Electrical & Control Solutions Pty Ltd is a family-owned, Indigenous business which serves commercial and industrial clients along New South Wales' South Coast. We also do residential work.

Directors Shannon and Eileen Stokes manage a team of technicians with the superior skills to deliver all your electrical needs.

Our services include Level 2 electrical work, test and tagging, commercial construction and, water and sewage treatment plants. We also specialise in hazardous areas.

You will find our sparkies to be competent, creative, thoughtful, punctual and safety conscious.

***Our electricians can help with all your commercial and industrial electrical needs. Our Level 2 electricians can plug you directly into the grid.***

***We acknowledge the Traditional Custodians of the land and water, the peoples of the Wiradjuri and Yuin Nations.***

**ABN:** 78 629 472 635

**Our Level 2 Sparkies can plug your home, office, business and factory directly into the grid.**

# Our Purpose

---

**We have the most skilled commercial and heavy industry electricians in Batemans Bay.**

BayCoast Electrical & Control Solutions is a family-owned business located in Batemans Bay, New South Wales.

Our Level 2 electricians can handle commercial and industrial electrical projects. Nothing is too big or too small for us.

We have installed automation and control motors and machinery, factory lighting systems, industrial pump systems and we've managed the electrical maintenance for quarry and plant facilities.

# Our Services

**BayCoast Electrical has over 25 years of experience crafting electrical solutions for residential, commercial and industrial projects. We enjoy finding creative solutions for your complex power needs.**

We can handle comprehensive office and industrial fit outs and we know our way around hazardous area electrical projects. We specialise in petrochemical installations and maintenance and two of our Tier 1 clients are leading global concrete producers.

We have the skills to design and build the electronic matrix to serve your high-density housing developments.

Our previous projects include complex new installations as well as refitting existing locations.

And we don't stop there: Our in-house test-and-tag team can certify the safety and viability of your electrical systems quarterly, annually, biennially... perennially.

## **Emergency service solutions:**

***During the 2019 bushfires, a dairy farmer needed an emergency power solution to service his herd and our sparkies were there to save the day.***

## **TEST AND TAG CERTIFICATION**

Safety first! New South Wales has certification standards for most electrical items and our licensed electricians can test and tag your workplace systems. We'll help your business secure your safety and avoid the government penalties.

## **HAZARDOUS AREAS EEHA**

We install petroleum equipment including critical hazardous area safety equipment. We provide full compliance with the strict EEHA protocols. We are certified to install, inspect and replace this critical equipment.

## **OFFICE FIT OUTS**

Existing spaces or new builds, we know our way around the process of plumbing the electrical lines that feed your electrical devices. From the office kitchen to the most complex production studio, we'll plug you in.

## **EV CHARGING STATIONS**

Trust BayCoast Electrical to install an EV charger at your home or business. Our team is certified to install, inspect and maintain this sophisticated state-of-the-art technology.

## **WATER AND SEWAGE TREATMENT PLANTS**

Could anything be more important than efficient effluent evacuation? Our sparkies will power even the most complicated sewage pressure systems.

## **EMERGENCY POWER SOLUTIONS**

When the lights go out, BayCoast Electrical is there with our experienced team to get power going and generate the energy important to your critical electrical devices.

# Areas We Service

Our experienced electricians have managed installations on new and existing building projects. We deliver industry best practices, using the latest business tools and techniques.

- ✔ Service Stations
- ✔ Civil Contractors
- ✔ Councils
- ✔ Manufacturers
- ✔ Builders
- ✔ Plants and Quarries
- ✔ Factories
- ✔ Insurance Works

We service many regions along the New South Wales South Coast including Batemans Bay, Bega Valley, Braidwood, Bodalla, Dalmeny, Eurobodalla, Moruya, Narooma, Tuross Head, Ulladulla and the surrounding towns.

# Accreditation and Expertise

## Why do you need a Level 2 Electrician?

In addition to repair and maintenance, our Level 2 electricians are licensed to handle complex installations. Those installations include wiring overhead and underground electrical systems that ultimately link the customer — whether residential, commercial and/or industrial — directly into the electricity grid. This is no small thing.

We can connect, disconnect and reconnect your project right at the source point for the public utility system.

There is no reason to have your crews standing around waiting for a qualified technician to manage the lines leading into the power grid. We're certified, qualified and capable.

***BayCoast Electrical & Control Solutions was Highly Commended by the National Electrical and Communications Association's "Emerging Small Business of the Year" award.***

# Health, Safety, Environment

To better serve our customers, BayCoast Electrical has done extensive professional training to advance the breadth and depth of our services.

We take the training and maintain these certifications because of our dedication to a professional approach to health, safety and the environment.

In addition to his Level 2 electrician certification, BayCoast Electrical Director Shannon Stokes is also licensed to work with petrochemicals and hazardous materials. Director, Eileen Stokes is licensed to conduct Test-Tag Certifications.

In 2019, as the bushfires burned across New South Wales, our electricians found themselves in the field crafting emergency solutions for customers and others. We used generators to keep the lights on at one of our local supermarkets and inside one of the regional aged-care centres.

We believe during times of crisis, it is our responsibility to help people who need emergency power solutions. To extend that care, we must be properly trained and certified to assure that things are done carefully, thoughtfully and safely.

Directors Eileen  
and Shannon Stokes.
