To whom it may concern,

In early 2020 I was engaged by Laing O'Rourke Australia to be the utility manager on the South Coast working on the Bushfire clean-up project. Shannon Stokes from "BayCoast Electrical & Control Solutions" provided the solution to how to resource this project with a skilled electrical team that knew the area and how difficult access could be to some remote areas. Shannon and his team inspected each property removing any electrical hazard whilst providing a comprehensive report ensuring the electrical safety of the clean-up team that followed.

In a very reactive environment BayCoast Electrical were flexible and very professional in their approach. They responded immediately to any last-minute requests allowing the project to keep to schedule.

It was a pleasure dealing with BayCoast Electrical on this project.
